

JG Speedfit should not be used for gas, fuel oil or compressed air applications

## JG Speedfit<sup>®</sup> PEX & Polybutylene Pipe

JG Speedfit fittings have been designed for use with both plastic and copper pipe, in diameters of 10mm to 28mm, and are approved by the Water Research Centre within the requirements of the UK Water Fittings Byelaws Scheme.

The twist and lock speedfit fittings have a collet with stainless steel teeth and an 'O' ring to provide a permanent leak-proof seal. A simple twist of a screw cap locks the pipe into position and increases the compression on the 'O' ring seal to give added security.

JG Speedfit products are fully certified by the British Board of Agreement, approved by the Water Regulations Advisory Scheme, and are kitemarked to BS7291, Parts 1 and 3.

- Mains fed and indirect cold water systems
- Vented and unvented hot water systems
- Vented central heating systems
- Sealed central heating systems provided temperatures and pressures comply with BS7291 Parts 1 and 3 Class S

British Gas accepted for water pipe in vented and sealed central heating systems

Solutions to Shape the World™

# One family of brands, one complete solution

Making lives easier is what drives us, and delivers value for our customers. It's the purpose behind every step forward we take. From inventing new water control valves in Australia, back in 1949, to launching a plumbing revolution with JG Speedfit.

**Now, we're one family of brands, providing one complete solution.**
