

# Talbot *Pushfit* FITTINGS FOR MDPE PIPE

Certificate number 1705071

## Fittings for MDPE Pipe

The Talbot Pushfit joint is a tried and tested method of joining low, medium and high density polyethylene water pipe from, 16mm to 180mm and their imperial equivalents.

The fitting is quick and easy to use with no nuts to leave undone - simply push the pipe into the joint. The joint's grip and seal on the pipe increases with water pressure and tensile load which means that the pipe will burst or neck before the joint fails.

Using a common body and only two sets of interchangeable components, Talbot Pushfit will connect to metric PE pipes and their imperial equivalents.
